ACE™ - Advanced Cutting Explosive

PRODUCT TECHNICAL DATA SHEET

DESCRIPTION:
ACE™ is an easy-to-use explosive cutting system with a flexible shaped charge liner and optimized standoff. The improved ACE™ is the highest level of Advanced Cutting Explosive offered by Ensign-Bickford Aerospace & Defense Company. The relative shock insensitivity of the explosive minimizes accidental or inadvertent detonation. The design meets MIL-PRF-46676 and OES-DTL-0006 standards for use by United States Military and International Forces.

KEY FEATURES:
- Optimized explosive geometry
- Advanced liner geometry and composition
- Optimized built-in foam stand-off
- Improved adhesive system
- Superior penetration and severance performance
- Increased multi-axis flexibility
- Low fragmentation hazard

APPLICATION:
ACE™ fulfills a wide variety of uses in military and demolition applications, including specialized demolition and breaching operations where precise cutting is required. With its variety of coreloads and ability to sever from 0.125 inches (3.2 mm) to over 1.5 inches (38 mm) of steel, ACE™ can remove or neutralize most obstacles encountered during combat operations. Due to its flexibility and self-adhesion, ACE™ is easy to apply, greatly assisting the speed of attachment to the target and minimizing personnel exposure time.

PROPERTIES:
- Built-in water displacing stand-off
- Consistent penetration/severance
- Suitable for underwater use
- No harmful sheath fragmentation
- Lead free
- Easy to cut with a sharp knife
- Compliant with Montreal Protocol
ACE™ - Advanced Cutting Explosive

Standard charge length (nominal) is 20 feet (6.1 meters) for all available parts.

PACKAGING OPTIONS:

ACE™ has two shipping options. The Commercial Pack holds the product in a fiberboard drum and the Military Pack is packaged in a metal ammunition can.
